

Easedale's home activity ideas

11.05.2020

Shape Shadows

Find a sunny spot in the house or garden.

Use Lego, blocks, toys, household objects or natural objects to make shape shadows.

You can draw around the shadows to make cool shape pictures.

Try colouring in the pictures or adding more detail if you can.

Talk about the shapes and colours in your pictures.

See the PowerPoint for ideas.

Water and Music

Watch the video to see how to do a fun science experiment with water to make different musical notes.

Can you make up a tune or join in with your favourite song using the different notes?

Minions Zumba

Get active and have fun with the Minions Zumba dance routine. Easedale were practising this routine in school.

Watch the video and see what you can remember.

Have fun teaching the moves to someone at home.
