

Numeracy - Big and small

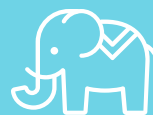

Watch a video

Watch a video about big and small. Every time you hear big can you stretch out wide and make yourself big. When you hear small, can you curl up into a ball.

Small items

Have a look around your house or garden. How many small things can you find.

Big items

Now find all the big items. The adult should model the language 'big' and emphasise this with their body, stretching out wide.

Sorting

Collect items from around your house or garden that are the same but significantly different sizes for example, a big book and a small book, a big shoe and a small shoe. Can you identify which one is big and which one is small from a choice of two? Write big and small on separate pieces of paper and use these to sort the items into two different categories.

Ordering

Collect three toys. Put them in order from small to big.

Have fun learning!
