

# Looking After Your Environment Derwent

## #1 Cleaning Windows

Mix vinegar and water in a spray bottle. You can add a few drops of lavender oil for smell, but you don't need to. Spray on windows and rub in big circular movements using scrunched up newspaper.

## #2 Sweeping

Sweep outside or in. Try sweeping in the kitchen. Can you bring all of the rubbish into one pile? Can you collect it all using the dustpan and brush?

## #3 Tidy your room

Tidy your room. Is there anything you don't need anymore? Can you organise any of your toys or books? Have a go at turning your clothes the right way out and folding them. Are there any clothes that don't fit you anymore?

## #4 Recycling

Can you identify or match the materials that can be recycled? Put everything in piles. Which do you have the most of? Which do you have the least of? What cannot be recycled? Put everything in the right bins.

## #5 Hoover

Can you have a go at hoovering one of the rooms in your house or a small area? Use a hand held hoover (if you have one and the big hoover is too heavy). Take a before and after picture to see the difference you have made!

## #6 Dusting

Make your own chemical free polish:  
1 cup water.  
1/4 cup vinegar (cuts through grease and grime & disinfectants)  
2 tsp olive oil (shines and protects wood)  
10-15 drops of Lemon essential oil\* (makes your home smell naturally fresh and clean!)  
Put in a spray bottle and use to polish surfaces in your house by spraying on and wiping away with a duster.
