

DIY Skittles

Make your own skittles using empty plastic bottles.

Fill the bottles about a quarter of the way with water, rice, stones, sand or flour etc. This is a good fine motor activity for the child to be part of.

Take turns rolling the ball to knock them down. Model language such as 'my turn' 'your turn' and 'waiting'.

Count how many are left standing.

Write the numbers down on paper to make number flashcards. Can the child identify the correct number?

Can you show me how many with your fingers?

Practice writing the number.
